YAKETY YAK

Dear Mom:

On Saturday, May 28th Brian & Bonnie Haupt hosted a party and car show at Carriage and Motor Works on the boulevard to celebrate the union of their daughter, Meredith and Justin Pritchard. Good food and a lot of "bench racing" was enjoyed by many KCR members and friends. Meredith, Justin & sons, Luke and William all reside in Granville, OH and they are all members of the Kansas City Region SCCA.

Ken & Char Keith spent a week in May on the beach at Sanibel, FL with friends from Houston, TX. They collected so many shells that Ken couldn't find the kitchen counter on his night to cook dinner! Char, Ken and Linda have been friends since 1961 when they all lived in Creve Coeur, MO and attended the same church as kids. David joined the group in 1975 when he and Linda were married. They will all be together again in July when Ken & Char travel to Houston for the wedding of Linda & David's youngest son, Colin.

Dentistry from the Heart provided free dentistry on Saturday, June 11th. This was a first come, first serve - and they guaranteed to see the first 100 adults. Adults 18+ received their choice of a simple cleaning, simple extraction or simple filling. Dr Kirk Collier was one of the volunteer dentists.

Ellen Wolf spent a week in Phoenix, AZ babysitting her granddaughter, Ella (who's regular babysitter was on vacation). Ella turned 1 year old in April. The evenings were full "spoiling" both grandchildren, Ella & big brother Jack, who is now 3½ years old and goes to pre-school.

DON'T LOOK BACK.....

PLEASE CALL "MOM" WITH YOUR NEWS. YOU CAN REACH HER BY PHONE 913-262-6300 or by mail 2701 West 47th Street, Shawnee Mission KS 66205 or by Fax 913-262-6719 or by email kcmomwilliams@aol.com

Shocking Information-Shock absorbers made simple by Dave Jones reprinted with permission given by St. Louis Region SCCA article submitted by Charlie Clark

Part 1

Better handling is a "Rubik's cube", with multiple factors all having to work together. One of the more intimidating or confusing factors can be shock absorbers or dampers as they are better described. Here are some bits and pieces I've learned at the track that might help.

First principle to remember-springs control AMOUNT of transfer or load, and shocks only control RATE of transfer or load. Think of it as a computer file you want to download. The size of the file is the LOAD. The shock is like your internal connection, It determines how slow or fast that load moves. So different shock and their different settings don't change how much weight (LOAD) is moved, they only change the rate at which it moves. This rate change is what either makes your car ride smoother on the highway, or handle better at the track.

Second principle to remember - the front suspension controls entry and the rear suspension controls exit, Sure you can stiffen the rear or grab the hand brake and make it break loose on entry-but we'd rather have the front grip better than making the rear slide.

Next principle - stiffer springs require LESS compression and MORE rebound. The spring itself provides compression, so more spring adds more compression, But the additional spring rate is extending the shock quicker after it is compressed, so to maintain the same ride you had, you have to add rebound to compensate.

And less grip potential, whether it is the track conditions or the tire quality, requires softer suspension, The higher the grip potential, the stiffer the suspension has to be to utilize that grip. As preached by shock guru Joe Stimota, "anyone who says they have a tir problem actually has a shock problem."

Think of shocks as bungee cords. In compression, shocks are like bungee cords connecting the tires to the pavement. They restrict the tire from uncontrolled bouncing, and the spring from uncontrolled compressing. In rebound, think of the shocks as bungee cords connecting the body to the tires. Too little rebound, and the body (and load) is removed from the tire too quickly, which by the way means that load goes to the other tires too quickly. Too much rebound, and the tire is literally pulled off the pavement-the shock can't extend as fast as the suspension drops.

Part 2 next month will discuss shock configurations, valving and the importance of adjustable shocks.

Dave Jones has been auto crossing and racing with SCCA since 1971, and developed his suspension techniques in the quest to win on a budget. In recent years, suspension tuning and data acquisition has become his passion.

The July Checkpoint also features
a hidden number contest.
Find the hidden number
somewhere in the publication.
E-mail the editor your findings and be
entered in a drawing for restaurant coupons.
Contest closes July 15th.
Good luck.

The June winner is Sharlene Smith.

Congratulations to her she will be receiving valuable restaurant coupons!

Kansas City Region's on-line resource for information,
online event registrations, updates, results and other fun stuff!

CHECKPOINT is the official publication of the Kansas City Region Sports Car Club of America. Any opinion expressed is that of the authors and is not necessarily the opinion of the members of the Region, its officers or the CHECKPOINT staff. By publishing advertising in CHECKPOINT the Kansas City Region does not endorse the products of service advertised. Permission to reprint all artwork, photographs and articles published in CHECKPOINT is given to all SCCA regional publications and to SCCA's Sports Car Magazine, provided full credit is given to the author, CHECKPOINT and the Kansas City Region SCCA. Deadline for submission to CHECKPOINT is the selected General Meeting date.
